

# Daniel R. Moisoff

## PROJECTS

### Share Your Build — Rails, PostgreSQL, React, Redux

[Live Site](#) | [Github](#)

Single page web application, where DIY enthusiasts share creative ideas, ranging from cooking recipes to costume guides.

- Used RESTful API design to perform full CRUD on projects, instructions, and comments.
- Created and integrated a rich text editor so users can format their instructions.
- Stored and updated images with AWS S3.

### Shibe Runner — JavaScript

[Live Site](#) | [Github](#)

Infinite runner browser-based game, built using vanilla JavaScript. Help Shibe collect lost spirits while avoiding ghouls.

- Dynamically generated ghouls, spirits, and their attributes which would update based on the player's current score.
- Controlled the creation of the ghouls and spirits through a function that measures an object's distance over time.
- Ensures that multiple game elements do not overlap while they are on the same y-axis.

## WORK EXPERIENCE

### App Academy, New York — Program Instructor

October 2018 - Present

I teach up to an advanced level of JavaScript and do one-on-one code reviews with students. I provide a strong programming foundation for students to gain acceptance into the most selective coding boot camps.

### The Mill, New York — Assistant Color Editor

JANUARY 2016 TO FEBRUARY 2018

Performed duties of colorist and technical project manager. Managed workflow and assisted with post-production editing for client film projects.

### Vision On, New York — Post-Production Assistant

MARCH 2014 TO OCTOBER 2015

Retouched special effects for commercials and short films. Managed exports for client review and final delivery.
