Daniel R. Moisoff

PROJECTS

Share Your Build — Rails, PostgreSQL, React, Redux

Live Site | Github

Single page web application, where DIY enthusiasts share creative ideas, ranging from cooking recipes to costume guides.

- Used RESTful API design to perform full CRUD on projects, instructions, and comments.
- Created and integrated a rich text editor so users can format their instructions.
- Stored and updated images with AWS S3.

Shibe Runner — JavaScript

Live Site | Github

Infinite runner browser-based game, built using vanilla JavaScript. Help Shibe collect lost spirits while avoiding ghouls.

- Dynamically generated ghouls, spirits, and their attributes which would update based on the player's current score.
- Controlled the creation of the ghouls and spirits through a function that measures an object's distance over time.
- Ensures that multiple game elements do not overlap while they are on the same y-axis.

WORK EXPERIENCE

App Academy, New York — *Program Instructor*

OCTOBER 2018 To PRESENT

I teach aspiring developers advanced JavaScript through one-on-one code reviews, providing a strong programming foundation for them to gain acceptance into the most selective coding bootcamps.

The Mill, New York — *Assistant Color Editor*

JANUARY 2016 TO FEBRUARY 2018

Performed duties of colorist and technical project manager. Managed workflow and assisted with post-production editing for client film projects.

Vision On, New York — *Post-Production Assistant*

MARCH 2014 TO OCTOBER 2015

Retouched special effects for commercials and short films. Managed exports for client review and final delivery.
