Daniel R. Moisoff

WORK EXPERIENCE

Wayfair, Boston — *Full Stack Software Engineering*

February 2019 — PRESENT

Built supplier facing tools used in the management of promotional events and flash deals. These tools increased supplier participation and expanded the amount of sales events being done.

App Academy, New York — *Software Engineering Program Instructor*

OCTOBER 2018 — February 2019

Teach beginner-to-advanced level JavaScript to aspiring developers, providing a strong programming foundation for students.

The Mill, New York — *Color Editor*

JANUARY 2016 — FEBRUARY 2018

Color corrected client film projects, including commercials, TV shows, and feature-length films. Responsible for managing workflow, asset delivery, and data systems.

WEB DEVELOPMENT PROJECTS

Share Your Build — Full Stack Single Page Web Application

Live Site | Github

Built using Rails, PostgreSQL, React, and Redux. Created a space where DIY enthusiasts can share creative ideas, ranging from cooking recipes to costume guides.

- Used RESTful API design to perform full CRUD on projects, instructions, and comments.
- Created and integrated a rich text editor so users can format their instructions.
- Stored and updated images with AWS S3.

React Random Selection Wheel — React npm package

Demo Site | npm Link | Github

A lightweight version of jQuery built using vanilla JavaScript.

- Generates a spinning wheel that randomly selects an input and displays it.
- The component is customizable through several properties.

Shibe Runner — Browser-Based Game

Live Site | Github

Built using JavaScript. Players can help Shibe collect lost spirits while avoiding ghouls.

- Dynamically generated ghouls, spirits, and their attributes, based on the player's current score.
